Education

- **Belarusian University of Informatics and Radioelectronics**
  Radioengineering and Electronics

- **Technical School - Cosinus**
  Technician Informatics Program

- **ITilogia**
  Front-End Development Course

Skill

- JavaScript
- HTML5, CSS(Scss,Sass)
- Angular
- Github, Git (Sourcetree)
- Webpack
- Bootstrap, Flexbox, CSS Grid
- RESTful APIs, AJAX, JSON, npm, Node.js, ES6+

Certifications

Cosinus | Feb 2019 - Feb 2021
EE09 and EE08

ITilogia | Sep 2023 - Oct 2024
Front-End Development

Language

Polish - C1

Russian - native

English - B2

Profile

I'm a passionate and detail-focused front-end developer with a background from ITilogia, where I completed a full front-end course. Throughout my studies, I learned to use various programming languages and tools, with a strong interest in creating web applications that are both efficient and user-friendly. My training gave me a solid base in IT, and I'm eager to bring my skills into a real work environment. Outside of tech, I play the piano, which has taught me patience, discipline, and dedication—qualities I bring into my development work. I'm excited to join a forward-thinking team, contribute to creative projects, and keep growing as a developer

My Projects

Cafe-tea Store Project

March 2024- Present

https://github.com/irinagrishkevich/cafe-tea

This Angular-based project is a dynamic e-commerce platform for a tea store. It features a user-friendly product catalog, an ordering system, and a real-time shopping cart managed via Angular services. The project includes custom components for displaying products and advantages, pipes for formatting currency and text. Additionally, a responsive design was implemented to ensure seamless use on all devices.

quiz_Angular Project

May 2024 - July 2024

https://github.com/irinagrishkevich/quiz_Angular

This TypeScript-based quiz application allows users to create and participate in custom quizzes. It features multiple question types, a timer, and score tracking. Users can select topics, set difficulty levels, and review results at the end. The project leverages TypeScript's strong typing for enhanced error detection and maintainability. It includes a modular design for scalability, ensuring future quiz categories can be easily added.

Freelance Studio Project

March 2024 - April 2024

https://github.com/irinagrishkevich/Freelance_studio

This project is a comprehensive web application for a freelance studio, built using the AdminLTE dashboard template. It integrates various libraries and frameworks to manage client projects, portfolios, and user interactions efficiently. The project includes responsive design, a customizable admin panel for managing site content, and dynamic UI components for better user experience. Technologies like jQuery, Bootstrap, and other JavaScript libraries were used extensively to provide additional functionality.
